Melissa

I think the attached information answers questions 1 and 2 for you. the last inspection was in 2010, it was due again for inspection in 2013;however, the tanks were illegally removed in 2012.

As for question 3, I have no direct knowledge of Mr. Tichnell operating tanks at the station. It was alleged by the neighbors that Mr. Tichnell assisted Mr. Martin in the removal of the USTs. We never had conclusive proof of that. We tried to get that information out of Martin, but was unsuccessful. Mr. Tichnell now is the current property owner. Since the tanks were removed prior to Mr. Tichnell acquiring the property, he had no requirement to file any paperwork with us.

I hope this helps, if you need anything further, please let me know.

Subject: Some Ernest Martin (FIN 3-906331) questions...

Hi Ruth – Hope all is well in WV. I met with my attorney, Phil Yeany, today to get the ball rolling on the Show Cause Letter we plan to send to Ernest Martin (re Bishop's Convenience Store), and we had a few questions we were hoping you could answer:

- 1) Is there a formal registration form that lists the tanks that were at the site? I got the info for what was there from conversations we've had, and things I might have picked up from your info requests to Martin, but we would like the formal WVDEP registration.
- 2) We were planning to cite Martin for failing to notify of the removal, and failure to do the site assessment, but we were wondering if there were any release detection/CP/overfill/etc violations that

had been found through a WVDEP inspection that might have taken place at the facility before the tanks were removed? We just want to make sure there weren't any additional violations that you wanted added.

- 3) We have noticed Fred Tichnell's name popping up all over the place, but he doesn't seem to be linked to the site formally to where we could list him as a respondent. Is there anything on your end connecting Tichnell to the site, as maybe an operator? Or does he now own the site and has he submitted anything to you guys to that effect?

Sorry to bother, but especially since this guy has been so difficult to try to deal with we want to make sure we have all our ducks in a row before our letter goes out. Thanks Ruth!

- White performing Inspection, Neighbors came over to investigate. The lady was the person who called in complaint on 8/26/10. She claimed that A TRUCK or TRUCKS have been Actioning at removing fuel to oil from tanks. She was concerned about the legality of such action. The man w/her (Husband I presume) concurred w/ all her statements. They were very well aware of Mr. Ernest Martin's shenanigans.
- You could see tire tracks in the grass where a truck had probably backed up to tanks, but sticking all the tanks there was only 1" of fuel in all of them, even the heating oil tank. There was 3" of fuel in all the tanks, in 8/08 inspection! The neighbors told me where Mr. Martin lived & how to find his house, in Maryland.
- Tanks may be Comp or Stripz. If comp they may have nodes. There is a tree section in PUL SP'LL Bucket.
- There are 3 MWS from 1-AKSITG - UNABLE TO OPEN - File says 1" - Photo shows MW is dry and unfit for LD.

INSTRUCTIONS AND GENERAL INFORMATION

Please type or print in ink. Also, be sure you have signatures in ink for sections VIII and XI. Complete a notification form for each location containing underground storage tanks. If more than 5 tanks are owned at this location, you may photocopy pages 3 through 5 and use them for additional tanks.

The primary purpose of this notification program is to locate and evaluate underground storage tank systems (USTs) that store or have stored petroleum or hazardous substances. The information you provide will be based on reasonably available records, or in the absence of such records, your knowledge or recollection.

State law requires UST owners to use this notification form for all USTs storing regulated substances that are brought into use after May 1, 1990, (May 8, 1986, by Federal law) or, USTs in the ground as of May 1, 1990, (May 8, 1986 by Federal law) that have stored regulated substances at any time. The information requested is required by the West Virginia Underground Storage Tank Act, Chapter 22 Article 17.

Who Must Notify? The UST Act requires owners of USTs that store regulated substances (unless exempted) to notify the Department of Environmental Protection of the existence of their USTs. "Owner" is defined as:

- In the case of an UST in use on November 8, 1984, or brought into use after that date, any person who owns an UST used for storage, use, or dispensing of regulated substances; or
- In the case of an UST in use before November 8, 1984, but no longer in use on that date, any person who owned the UST immediately before the discontinuation of its use.

Also any facility that has made any changes to facility information or UST system status, must submit a notification form.

What USTs Are Included? An UST system is defined as any one or combination of tanks that (1) is used to contain an accumulation of regulated substances, and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Regulated USTs store petroleum or hazardous substances (see the following "What Substances Are Covered").

What Tanks Are Excluded From Notification?

- Tanks removed from the ground on or before May 8, 1986;
- Farm or residential tanks of 1,100 gallons or less capacity storing motor fuel for noncommercial purposes;
- Tanks storing heating oil for use on the premises where stored;
- Septic tanks;
- Pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
- Surface impoundments, pits, ponds, or lagoons;
- Storm water or waste water collection systems;
- Flow-through process tanks;
- Liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
- Tanks on or above the floor of underground areas, such as basements or tunnels;
- Tanks with a capacity of 110 gallons or less.

What Substances Are Covered? The notification requirements apply to USTs containing petroleum or certain hazardous substances. Petroleum includes gasoline, used oil, diesel fuel, crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute). Hazardous substances are those found in Section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA.

Where To Notify? Send completed forms to:

W. Va. Department of Environmental Protection
Division of Water & Waste Management - UST
601 57th St.
Charleston, WV 25304

When To Notify: 1. Owners of USTs in-use or that have been taken out of operation, but still in the ground must notify by May 1, 1990, (May 8, 1986, by Federal law). 2. Owners who bring USTs into use after May 1, 1990, (May 8, 1986, by Federal law) must notify within 30 days of bringing the UST into use. 3. Notification of any amendments to facility must be filed by December 31 of that year. 4. New owners.

Penalties: Any owner who knowingly fails to register or submits false information shall be subject to a civil penalty not to exceed \$10,000 for each tank that is not registered or for which false information is submitted.
